

# Bligh Government To Consider More Medications In Tap Water - Chemicals To Fight Depression, Headaches And Obesity

*A GreenDay Media exclusive report.*

**A Government source has revealed that Anna Bligh has been approached by leading chemical companies eager to add 'community benefits' to tap water.**

The Government has expressed interest in '**tap water therapies**', and recently added fluoride to Brisbane region's water supply to fight tooth decay.

Bligh has become an 'instant celebrity' in the eyes of the drug and chemical companies,' a spokesman for ChemWatch reported. 'Manufacturers see tap water as a great profit stream, and are seeking Government approval for at least 15 more additives.'

## **MORE MEDICATIONS LIKELY BEFORE 2010**

'We are interested in the health and welfare of the community, and we'll consider these additives as they are presented to us,' Bligh said.

"We believe that besides tooth decay, there are a number of health issues we can help the public overcome. We know most people are lazy, they are uneducated, and **they are a burden on the hospital system**, so we believe we have a mandate to protect them by whatever means we have at our disposal.'

## **MORE CHEMICALS TO CURE ILLNESS AND DISEASE**

Despite warnings from scientists worldwide, and evidence that fluoride was a poison, Bligh was adamant.

'I don't care what the scientists say. My reports are all I need. I don't care about community protests, and meetings, and all those letters and complaints I receive. My job is to **work with the chemical companies**, to deliver medications, whether people like it or not. If people don't like it, they can go live in Fiji.'

Our agenda is part of the global push to fight obesity, depression, anxiety, headaches, chronic fatigue and even cancer with tap water therapy. We have fluoride, and we can do a lot more given the research I have seen.' Bligh added.

A group representing doctors, lawyers, brain surgeons, celebrities, nurses, radio staff, TV presenters, journalists and school teachers will address a public protest -

**RALLY AGAINST TAP WATER THERAPIES AND MEDICATION, OUTSIDE PARLIAMENT HOUSE BRISBANE 9 AM - 11 AM 10TH FEBRUARY, 2009.**

It is hoped that 1000's of people gather to protest against the Government and chemical companies push to add more and more chemicals into tap water in Australia.

## Corruption Just Confessed by FDA Scientists!

***Group of FDA Scientists sent letter to President-elect Barack Obama's transition team "pleading with him – managers have ordered, intimidated and coerced scientists to manipulate data in violation of the law"***

<http://www.soundandfury.tv/pages/rumsfeld.html>

In this movie you will also see Arthur Evangelista who worked for the FDA and left because of this corruption back in the early 1990's. At the time the FDA were already manipulating data. Let's send him back with Dr. Stoller. He will get rid of aspartame which is costing this country trillions in medical care and stop the suffering of those with aspartame cancer and all the diseases listed in the 1000 page medical text, "Aspartame Disease: An Ignored Epidemic", [www.sunsentpress.com](http://www.sunsentpress.com) by H. J. Roberts, M.D. Over 100, 000 people have died just from drug interaction.

The FDA also serves above the law. The law states a Citizens Petition must be answered in 180 days. My petition for ban was sent certified mail over 6 years ago and remains unanswered. The imminent health hazard amendment which is required to be answered in a week or ten days was sent over a year ago. The FDA simply violates the law. FDA toxicologist, Dr. Adrian Gross, told Congress in 1985 that aspartame (NutraSweet/Equal, etc.) violated the Delaney Amendment because it caused brain tumors and brain cancer, and if the FDA violated its own law who is left to protect the public? Read it on the front page banner of [www.mpwhi.com](http://www.mpwhi.com) Is somebody now listening?
